PROFESSIONAL PROFILE

Electronic Commerce graduate and Software/Web Developer with practical experience building and maintaining WordPress websites and developing web-based information systems. Developing full-stack applications using React and Vite on the frontend, Django on the backend and PostgreSQL for data storage. Also familiar with Python, JavaScript, PHP, HTML, CSS, Node.js, Flask, MySQL, Git and GitHub. Deployed an Internship Management System application to Vercel and currently completing its PostgreSQL integration; also developing a School Management System. Brings hands-on client website experience, problem-solving skills and a strong commitment to continuous learning.

CORE SKILLS

Programming: Python, JavaScript, PHP, HTML5, CSS3
Frontend: React, Vite, responsive web development
Backend: Django, Node.js, Flask
Databases: PostgreSQL, MySQL, database management and data organisation
CMS and deployment: WordPress, Elementor, Vercel, theme and plugin management
Version control: Git, GitHub, source-code versioning and repository management
Supporting skills: Website troubleshooting, domain management, DNS records, technical SEO

PROFESSIONAL EXPERIENCE

Web Developer | Suwani Plant Hire | February 2025 – Present

- Develop and customise WordPress websites for client businesses, translating requirements into clear page layouts, navigation and service information.
- Maintain WordPress themes and plugins, implement requested features, update site content and support ongoing website functionality.
- Monitor website performance using Google Analytics, Google Site Kit and Google Search Console, reviewing traffic, clicks, impressions and engagement trends.
- Carry out technical website audits with Screaming Frog SEO Spider to identify broken links, missing metadata, crawlability and site-structure issues.
- Use Semrush for website-health reviews, keyword research and backlink analysis, and apply findings to website and content improvements.
- Manage domain settings and DNS records to support correct website configuration and accessibility.
- Create client-facing promotional graphics, flyers and logos using Canva.

Internship Student | Harare Institute of Technology – E-commerce Department | January 2023 – August 2023

- Supported database management activities, including data organisation, record maintenance and basic troubleshooting.
- Contributed to the development of an internship management system concept to simplify student internship placement registration.

SELECTED PROJECTS

Internship Management System | *React, Vite, Django, PostgreSQL, Vercel* | *Deployed application; database integration in progress*

Developed a web-based system for students to register internship details, including placement information and assessment schedules. Deployed the application to Vercel; currently completing the PostgreSQL database connection and integration required for full functionality.

Project: internship-management-system-8yxu.vercel.app/

SELECTED PROJECTS (CONTINUED)

School Management System | *React, Vite, Django, PostgreSQL, Vercel* | *In progress*
Developing a school administration platform using a React and Vite frontend, Django backend and PostgreSQL database, with Vercel used as the deployment platform.

Zari Vaal Lodge Website | *WordPress, Elementor*
Designed and developed the website from scratch to establish a professional online presence for a hospitality business.
Project: zarivaallodge.co.za/

Oven Delights Bakery Website | *WordPress*
Developed a bakery website presenting the business brand, products and information through an organised online presence.
Project: ovendelights.great-site.net/

Sports Betting Website | *Client project*
Worked on a sports betting website for a client, applying web development skills to deliver a solution aligned with the client's requirements.
Project: esportbehub.com/
